This house can be used as a vacation house or full time home. It was the dream of a NY architect (who still owns it today) that was fulfilled on weekend trips with a few loyal friends and family members. It is in a perfect location overlooking Penobscot Bay where you can eat lobster while watching the ebb and flow. Built with an open floor plan, there is an office that can easily be converted to a bedroom right off the main floor for people who may have trouble with the stairs. Your children will be thoroughly entertained in the basement that has two bedrooms and a large playroom or games room. The other bedrooms are up the luxurious spiral staircase completely constructed with "tongue and groove" joints. The master has its own en suite and plenty of closet space. You will have to come for yourself to completely appreciate the beauty of this amazing home.
